

SPRING CULTIVATOR

Spring Cultivator has been designed to deliver sturdy performance at varying soil conditions. Heavy duty channel mainframe and tine assembly resist heavy bending strains. Heavy duty dual springs retain their strength for longer life and ensure safety of shovels from heavy obstacles.

SPECIAL FEATURES

- » Heavy duty channel used sturdy frame to withstand heavy loads, bending stresses and strains.
- » Thicker tines to restrain sudden impact loads.
- » Positive projection angle of tines to give easier and deeper penetrations with effective uprooting of crop residue and cutting of heavy soil clods.
- » Dual Springs to provide high tensile strength to each tine to safeguard during heavy shock loads and impact loads.
- » Sharp edged Reversible shovels that gives deeper penetrations at any soil conditions and can be reversed and used on the other side after complete wear of one side.
- » Provision for spacing adjustments between tines to be useful for various soil conditions and various crops.
